INTERNAL RISKS

- 1. We have acquired preclinical CRO facility at Gummidipundi, Chennai of Kemin Industries South Asia Private Limited and any failure to realize the anticipated benefits of this acquisition may have an adverse effect on our business, results of operations, financial condition and cash flows.***

Vide Asset Transfer Agreement dated February 18, 2016 entered into between Kemin Industries South Asia Private Limited and our Promoter Mohan Krishna Mulakala and thereafter post incorporation on April 29, 2016 ratified by our Company pursuant to resolution dated April 30, 2016, passed at the meeting of our Board of Directors, our Company purchased the preclinical contract research organization facility at Gummidipundi, Chennai named as "Vanta Bioscience" from Kemin Industries South Asia Private Limited (a toxicology division of Kemin Industries South Asia Private Limited) along with leasehold rights in 4.8 acres of land situated at Plot K2B, SIPCOT Industrial Estate, Gummidipundi, Chennai – 601 201. For details regarding the acquisition of the said preclinical CRO facility at Gummidipundi, Chennai, please refer "History and Certain Corporate Matters" on page 87.

The success of the acquisition of the said preclinical CRO facility at Gummidipundi, Chennai will depend, in part, on our ability to realize the anticipated growth opportunities and synergies from the acquired business. This strategic acquisition may require that our management develop expertise in new areas, manage new areas of business and thus the clients. This could be a task that will require substantial time, expense and efforts from our management. If management's attention is diverted or there are any difficulties associated with establishing and executing the 'preclinical trials and toxicology business', our results of operations and cash flows could be adversely affected.

If we do not successfully integrate the said preclinical CRO facility at Gummidipundi, Chennai, anticipated operating advantages and cost savings may not be realized. The acquisition and integration of the preclinical CRO facility at Gummidipundi, Chennai involve a number of risks, including:

- implementation or remediation of controls, procedures and policies at the preclinical CRO facility at Gummidipundi, Chennai;
- lower than expected business of the preclinical CRO facility at Gummidipundi, Chennai;
- integration of preclinical CRO facility at Gummidipundi, Chennai's accounting, human resources and other administrative systems, including management information, purchasing, accounting, finance, billing, payroll and benefits and regulatory compliance;
- inability to identify all the risks, liabilities and challenges in relation to the preclinical CRO facility at Gummidipundi, Chennai;
- difficulties in the assimilation and retention of employees;
- difficulties in the maintenance of relationships with the stakeholders of preclinical CRO facility at Gummidipundi, Chennai;
- implementation of new regulations and laws which have a negative impact on preclinical CRO facility at Gummidipundi, Chennai's profitability;
- increase in fixed costs;
- ongoing obligations under agreements related to the preclinical CRO facility at Gummidipundi, Chennai;
- infringement claims, violation of laws, commercial disputes, tax liabilities and other known and unknown liabilities; or
- inheritance of claims or liabilities, as a result of strategic acquisitions, including claims from clients, business partners or other third parties and potential adverse effects on our operating results.

Despite our due diligence process, we may fail to discover significant issues around preclinical CRO facility at Gummidipundi, Chennai's intellectual property, service offerings, customer relationships, employee matters, accounting practices or regulatory compliances. We may acquire unidentified liabilities or fail to discover liabilities that are not properly disclosed to us or inadequately assessed in our due diligence efforts liabilities that may arise out of such acquisitions. We cannot predict or guarantee that our efforts will be effective or will protect us from liability. If we are unable to obtain indemnification protection or other contractual protections or relief for any material liabilities associated with our acquisitions of preclinical CRO facility at Gummidipundi, Chennai, our business, financial condition and results of operations could be adversely affected.

Even if we are able to successfully executing the business operations, it may not be possible to realize the full benefits of the opportunities, the synergies and other benefits that we currently expect will result from this acquisition, or realize these benefits within the time frame that we currently expect. Any failure to realize the anticipated benefits in a timely manner, or at all, could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, this acquisition may also expose us to potential risks, including risks associated with the integration of new operations, services and personnel, unforeseen or hidden liabilities, our inability to generate sufficient revenue to offset the costs of acquisitions, and potential loss of, or harm to, relationships with employees, suppliers or customers, any of which could significantly disrupt our ability to manage our business and adversely affect our financial condition and results of operations.

Accordingly, we cannot assure you that our current acquisition of preclinical CRO facility at Gummidipundi, Chennai will prove value accretive to us and to our shareholders. If any of the risks described above or any other incidental risks should materialize, our growth strategy, business, results of operation, cash flows and prospects may be adversely affected. We may not be able to maintain the levels of operating efficiency that preclinical CRO facility at Gummidipundi, Chennai achieved separately under KISAPL. Successful integration of acquired operations will depend upon our ability to manage those operations and to eliminate redundant and excess costs. Failure in effectively implementing our growth strategies may result in diminution, loss or write-off of our investments in such venture, which could materially adversely affect our business, results of operation, cash flows and financial condition.

2. *Our Company has very limited operating history that can provide an adequate basis on which to judge its future prospects and results of operations.*

Our Company was incorporated in April 2016 and has commenced commercial activities since April 1, 2017. As we have very limited operating history, it may not provide a meaningful basis for you to evaluate our business, financial performance and prospects. Accordingly, you should not rely on our results of operations for any prior periods as an indication of our future performance. You should consider our business and prospects in light of the risks, uncertainties,

expenses and challenges that we will face as an early-stage company operating in a growing market. Going forward, we may not be successful in addressing the risks and uncertainties we will confront, which may materially and adversely affect our Company's results of operations, financial condition and business prospects.

3. *Our preclinical trials create a risk of liability and increased regulations, which may have an adverse impact on our business and results of operations.*

Preclinical trial contract research services involve the testing of new drugs, chemicals, feed ingredients, agrochemicals, biologics and medical devices on cells, tissues and animals. This testing creates risks of liability for personal injury, sickness or death of animals resulting from their participation in the studies. These risks include, unforeseen adverse side effects, improper application or administration of a new drug, biologic, or device, and the professional malpractice of animal care providers.

We may be required to pay substantial damages or incur legal costs in connection with defending any claims arising out of injury or loss of life or damage to an employee or worker exposed to toxic chemical or product under testing in preclinical trials. The insurance, if any, taken by us may not be sufficient to cover damages in case of loss of life, injury to body organs, etc. If we are required to pay damages or bear the costs of defending any claim for loss of life or damage to any body organ of the worker or employee on account of any preclinical trial that is beyond the level of any insurance coverage, our business and results of operations may be adversely impacted.

In addition, regulatory agencies may introduce newer stricter regulations that prevent or restrict preclinical studies and trials. Our preclinical studies and trials may also be the focus of negative attention from special interest groups that oppose preclinical trials on animals on ethical grounds. Any inability to conduct preclinical trials would have a material adverse effect on our business and results of operations.

4. *We require certain approvals and licenses in the ordinary course of our business and are required to comply with certain rules and regulations to operate our business. Any failure to obtain or retain or renew such approvals and licences or comply with such rules and regulations, in a timely manner or at all may adversely affect our business, financial condition and results of operations.*

We have acquired the preclinical contract research organization facility at Gummidipundi, Chennai named as "Vanta Bioscience" from Kemin Industries South Asia Private Limited (a toxicology division of Kemin Industries South Asia Private Limited) along with leasehold rights in 4.8 acres of land situated at Plot K2B, SIPCOT Industrial Estate, Gummidipundi, Chennai – 601 201. For details regarding the acquisition of the said preclinical CRO facility at Gummidipundi, Chennai, please refer "History and Certain Corporate Matters" on page 87.

Pursuant to the said acquisition by our Company and in order to commence / continue commercial operations at the said preclinical CRO facility at Gummidipundi, Chennai, we are in the process of getting certain licenses, permits and approvals that are currently in the name of KISAPL, transferred to our Company's name. In certain cases such licenses, permits and approvals may not be transferrable and our Company shall be required to apply afresh for such licenses, permits and approvals. For more information, please refer "Key Industry Regulations and Policies" and "Government and Other Approvals" on pages 82 and 138, respectively.

Many of these licenses, permits and approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the licenses, permits and approvals from third parties required for the operation of our facilities will be issued or granted in a timely manner or at all to allow the uninterrupted operations at the said preclinical CRO facility at Gummidipundi, Chennai.

Our preclinical CRO business is subject to extensive government regulation and we require several statutory and regulatory permits, licenses and approvals in the ordinary course of our business, including in relation to the protection of the environment and occupational health and safety, and those governing the generation, transportation and disposal of, environmental pollutants or hazardous materials resulting from our preclinical research activities. Environmental and occupational health and safety laws and regulations, and the interpretation and enforcement thereof, are subject to change and have tended to become stricter over time, in India and internationally. Further, these licenses, permits and approvals could be subject to several conditions, and we cannot assure you that we would be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, permits and approvals. While we are not aware of any outstanding material claims or obligations, we may incur substantial costs, as a result of any violation of environmental or health and safety laws or non-compliance with licenses, permits and approvals required for our facility, which, as a result, may have an adverse effect on our business and financial condition.

5. ***We are dependent on a number of key personnel, including our senior management with specialized technical know-how. We can also not assure that we will be able to attract and retain trained personnel in accordance with our requirements at all times. Loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.***

Our activities in preclinical research and development require our Company to engage highly qualified & skilled employees, like scientists, with specialised training. Our performance depends largely on the efforts and abilities of our senior management and other key personnel, including our present officers who have specialized technical know-how. As on March 31, 2017, 30 employees of our Company were holding doctoral degrees or master degree. Increase in employee compensation in India may adversely affect our business or operations as it may reduce our Company's profit margins.

While we consider our current employee relations to be satisfactory, there can be no assurance that we will be able to attract and retain trained employees in accordance with our requirements at all times or that we will not experience future disruptions to our operations due to disputes with our employees or other problems with employees which may adversely affect our business or operations. We expect that our employee costs will continue to increase over the coming years due to continued escalation in salaries and benefits as well as headcount growth. Non-availability of requisite number of employees or trained employees or inability to attract and retain trained employees or attract employees at increased compensation levels may adversely affect our business, results of operations, profit margins and financial condition.

6. ***Any quality control issues / problems at our facility may damage our reputation and expose us to litigation or other liabilities, which could adversely affect our results of operations and financial condition.***

Preclinical trials in India are subject to significant regulatory scrutiny. We own preclinical CRO facility at Gummidipundi, Chennai for rendering preclinical research facilities to our Clients. We need to register, for rendering preclinical contract research facility, in accordance with the good laboratory practices (GLP) stipulated by the National Good Laboratory Practices (GLP) Compliance Monitoring Authority (NGCMA), Department of Science and Technology, Government of India and has been made as an obligatory requirement for undertaking studies complying to GLP by state level food and drug administrations, the Drugs Controller General of India ("DCGI"), Central Drugs Standard Control Organization of India ("CDSCO") and other regulatory agencies. The data generated in compliance to GLP is only accepted by regulatory agencies and many of the regulatory agencies in Europe and US needs the animal facility to be accredited by AAALAC (Assessment and Accreditation of Laboratory Animal Care).

Further, we are liable for the quality of our services for the entire duration of the preclinical research. After conclusion of our preclinical research, certain developments could adversely affect demand for our services, including new scientific information, greater scrutiny in advertising and promotion, the discovery of previously unknown side effects or the recall or loss of approval of products that our clients manufacture, market or sell. Any such quality control, or related issues, which affect our services may have an adverse impact on our reputation, business and results of operations. Further, disputes over non-conformity of our services with applicable quality standards or specifications are generally referred to government approved independent testing laboratories. If any such independent laboratory confirms that our services do not conform to the prescribed or agreed standards and specifications, we may have to bear the expenses of recalling, replacing and testing such products of our clients. We also face the risk of loss resulting from, and the adverse publicity associated with, product liability lawsuits, whether or not such claims are valid. A successful product liability claim may require us to pay substantial sums and may adversely affect our results of operations and financial condition.

7. ***The cost of bringing a new molecule to the market is very high and sufficient risk capital may not be available with our Clients. In case our Clients are unable to obtain additional funding to support the operations as and when required, they may be required to reduce their research and development activities or curtail their operations thereby affecting our services, business and financial condition adversely.***

Our preclinical CRO facility at Gummidipundi, Chennai runs on the studies contracted by our sponsors. In case our sponsors lose interest in allocating resources and finances for such studies due to lot of uncertainty around the successful discovery and development or for any other reason they may not be willing to invest more in the drug discovery and thus the development and the number of molecules that our Company may receive for preclinical and non-clinical development may reduce which may have an impact on our overall business and financial results. Moreover, because of the change in regulatory requirements and thus the type of the studies which our Company may not be capable of undertaking them without increasing the capacity and capability and in order to remain viable in business they will have to invest more and this may go to an extent that their planned expenditure requirements exceed their available resources

or there is an increase in their development activities to meet the business need they will be required to seek additional debt or equity financing.

We cannot assure you that our Clients will be willing to raise additional financing on acceptable terms in a timely manner or at all. Their lack of interest in renewing arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner, may require them to reduce their research and development activities or curtail their operations thereby affecting our services, business and financial condition adversely.

8. *Compliance with, and changes in, safety, health and environmental laws and various labour, workplace and related laws and regulations including terms of approvals granted to us, may increase our compliance costs and as such adversely affect our business, prospects, results of operations and financial condition.*

We are subject to a broad range of safety, health, environmental, labour, workplace and related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal and storage of animals used in preclinical trials, noise emissions, air and water discharges; on the storage, handling, discharge and disposal of animals used in preclinical trials, chemicals, employee exposure to hazardous substances and other aspects of our operations. For example, laws in India limit the amount of hazardous and pollutant discharge that our preclinical contract research facility may release into the air and water.

The discharge of substances that are chemical in nature or of other hazardous substances into the air, soil or water beyond these limits may cause us to be liable to regulatory bodies and incur costs to remedy the damage caused by such discharges. We try to prevent such hazards by training our personnel, conducting industrial hygiene assessments and employing other safety measures. However, we cannot assure you that we will not experience accidents in the future. Any accident at our facilities may result in personal injury or loss of life, substantial damage to or destruction of property and equipment resulting in the suspension of operations. Any of the foregoing could subject us to litigation, which may increase our expenses in the event we are found liable, and could adversely affect our reputation.

The adoption of stricter health and safety laws and regulations, stricter interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that we make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. Complying with, and changes in, these laws and regulations or terms of approval may increase our compliance costs and adversely affect our business, prospects, results of operations and financial condition.

We are also subject to the laws and regulations governing relationships with employees in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and termination of employees, contract labour and work permits. Our business is also subject to, among other things, the receipt of all required licenses, permits and authorizations including local land use permits, building and zoning permits, and environmental, health and safety permits. There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new services. We do not carry any insurance to cover environmental losses and liabilities in India.

9. *We have issued Equity Shares during the last one year from the date of filing of the Draft Prospectus at a price that is below the Issue Price.*

During the last one year from the date of filing of the Draft Prospectus we have issued Equity Shares at a price that is lower than the Issue Price as detailed in the following table:

Date of allotment	Number of Equity Shares allotted	Face value (₹)	Issue Price (₹)	Nature of Consideration	Nature of allotment	% of Pre-Issue Equity Share Capital	% of Post-Issue Equity Share Capital

10. ***Our preclinical contract research facilities are concentrated in a single region and any adverse developments affecting this region could have an adverse effect on our business, results of operations, financial condition and cash flows.***

Our current and upcoming preclinical contract research facilities are located in Gummidipundi, Chennai, Tamil Nadu. Consequently, any significant social, political or economic disruption, or natural calamities or civil disruptions in this region, or changes in the policies of the state or local government of this region or the Government of India, could require us to incur significant capital expenditure and change our business strategy. We cannot assure you that there will not be any significant disruptions in our operations in the future. The occurrence of or our inability to effectively respond to any such event, could have an adverse effect on our business, results of operations, financial condition and cash flows.

11. ***Substantial portion of our revenues will dependent upon few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.***

Our Company was incorporated in April 2016 and has commenced commercial activities only since April 1, 2017. As we have very limited operating history, it may not provide a meaningful basis for you to evaluate our business, financial performance and prospects. We believe that going forward we will depend on a limited number of clients who avail our preclinical contract research services for conducting preclinical trials. We cannot assure you that we will be able to renew our agreements with the client/s on commercially acceptable terms or at all. In the event our existing agreements are terminated, we will be required to re-negotiate the terms of agreements with the new client who intend to avail our services for conducting preclinical trials and we cannot assure that the new arrangements will be on commercially acceptable terms. In the event we are unable to enter into new agreements, or renew or extend the term of the existing agreements with the client/s on terms acceptable to us or at all, our business, results of operations and future prospects could be adversely affected.

12. ***Our operations could be interrupted by damage to our preclinical CRO facility at Gummidipundi, Chennai which could adversely affect our financial condition.***

We use dangerous materials including flammable and explosive materials in our preclinical CRO facility at Gummidipundi, Chennai and are therefore subject to the risk of loss arising from fire. In catastrophic events, including fires or explosions, could damage our laboratories, equipment, scientific data, work in progress or inventories of chemical compounds and may materially interrupt our business. We employ safety precautions in our laboratory activities in order to reduce the likelihood of the occurrence of these catastrophic events. However, we cannot eliminate the chance that such an event will occur. The rebuilding of our preclinical CRO facility at Gummidipundi, Chennai could be time consuming and result in substantial delays in fulfilling our objectives. Due to these factors our financial condition could be affected adversely.

13. ***The R&D materials required for our Company’s business activities may not be easily available in the domestic markets and volatility in the prices of the R&D materials required may have an adverse impact on our business and financial condition.***

The R&D materials required by our Company for conducting preclinical trials may not be easily available in domestic markets. The prices of R&D materials including the laboratory animals species used in preclinical trials like rats and mice may fluctuate, depending on among other factors, the number of producers/suppliers and their production volumes or prices and changes in demand in the principal markets. Our Company does not have any long term agreement with suppliers for the purchase of the R&D materials, among others rats and mice. We are exposed to and will have to absorb any fluctuations in the prices of these R&D materials, which may adversely affect financials of our business and financial condition.

14. ***The agreements we have entered into with our employees, consultants, advisors etc. may not afford adequate protection for our trade secrets, confidential information and other proprietary information.***

In an effort to maintain the confidentiality and ownership of our trade secrets and proprietary information, we require our employees, consultants, advisors to execute confidentiality and proprietary information agreements. However, these agreements may not provide us with adequate protection against improper use or disclosure of confidential information and there may not be adequate remedies in the event of unauthorized use or disclosure.

Furthermore, we may from time to time hire scientific personnel formerly employed by other companies involved in a similar business as that of ours. In some situations, our confidentiality and proprietary information agreements may conflict with, or be subject to, the rights of third parties with whom our employees, consultants or advisors have prior employment or consulting relationships. Although, we require our employees and consultants to maintain the confidentiality of all proprietary information of their previous employers, these individuals, or we, may be subject to allegations of trade secret misappropriation or other similar claims as a result of their prior affiliations.

Also, others may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets. Our failure or inability to protect our proprietary information and techniques may inhibit or limit our ability to compete effectively, or exclude certain competitors from the market.

15. ***Our facilities are subject to client inspections and quality audits and any failure on our part to meet their expectations or to comply with the quality standards set out in our contractual arrangements, could result in the termination of our contracts and adversely affect our business, results of operations, financial condition and cash flows.***

Pursuant to our contractual arrangements, certain of our clients may have the right to regularly examine our preclinical processes, quality control and procedures and registers of our preclinical contract research facilities after reasonable notice and at a reasonable time to ensure that our services are meeting their internal standards and regulatory requirements. Most of our clients may routinely inspect and audit our facilities. Any failure on our part to meet the expectations of our clients and to comply with the quality standards set out in our contractual arrangements could result in the termination of our contracts and our clients may choose to source their requirements from our competitors. We may also incur significant costs to upgrade our facilities and preclinical processes. The occurrence of any such event could have an adverse effect on our business, results of operations, financial condition and cash flows.

16. ***We have a substantial amount of outstanding indebtedness, which requires significant cash flows to service and limits our ability to operate freely. Further, our indebtedness and our failure to comply with certain restrictive covenants under our loan agreements could adversely affect our financial condition and results of operations.***

As of March 31, 2017 the outstanding principal amount of our total secured borrowings was ₹750.00 lakhs. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business. Increasing level of our indebtedness also has important consequences to us such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- limiting our ability to borrow additional funds; and
- increasing our interest expenditure.

We cannot assure you that we will generate sufficient cash to service existing or proposed borrowings or fund other liquidity needs, which could have an adverse effect on our business, results of operation, cash flows and financial condition.

Further, the agreements for our fund based and non-fund based credit facilities including term loans, contain restrictive covenants relating to issuance of new shares, changes in capital structure, making material changes to constitutional documents, implementing any expansion scheme, incurring further indebtedness, encumbrances on or disposal of assets, paying dividends and making investments over certain thresholds. Furthermore, some of our financing arrangements specify that upon the occurrence of an event of default, the lender shall have the right to, *inter alia*, cancel the outstanding facilities available for drawdown, declare the loan to be immediately due and payable with accrued interest and enforce rights over the security created. In case we default in any of our outstanding borrowings, we may not be able to declare or issue dividend, without the approval of our lenders. There can be no assurance that we will be able to comply with these restrictive covenants, or that we will be able to obtain the consents necessary to proceed with the actions which we believe are necessary to operate and grow our business, which may in turn have a material adverse effect on our business and operations.

For further information on the indebtedness of our Company, please refer “Financial Indebtedness” on page 132. We cannot provide any assurance that our lenders will not enforce their rights relating to our breach of restrictive covenants, or grant us waivers with respect to any such breaches. In the event that any lender seeks the accelerated repayment of any such loan or seeks to enforce any other rights against our Company, it may have a material adverse effect on our business, cash flows and financial condition.

17. ***Our Promoters have mortgaged their personal properties and provided personal guarantees for our borrowings to secure our loans. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the mortgage / personal guarantees provided by our Promoters in connection with our Company's borrowings.***

Our Promoter, Mohan Krishna Mulakala has mortgaged his personal property and our Promoters Mohan Krishna Mulakala and Dopesh Raja Mulakala have provided personal guarantees for our borrowings to secure our loans. If any of these mortgage / guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative mortgage / guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the mortgage / personal guarantees provided by our Promoters in connection with our Company's borrowings.

18. ***Significant disruptions of information technology systems or breaches of data security could adversely affect our business.***

Our business is dependent upon increasingly complex and interdependent information technology systems, including internet-based systems, to support business processes as well as internal and external communications. For instance, we have implemented an information technology system to handle purchase of materials, services, inventory, supply chain management, invoicing, accounting, payments, collections, reconciliation, taxation, regulatory compliance, human resources management and other business functions. We have also implemented a sales personnel management system which has the capability to record data, including presenting analysis and historical trends. The size and complexity of our computer systems may make them potentially vulnerable to breakdown, malicious intrusion and computer viruses. We have experienced certain minor disruptions to our information technology systems due to power supply interruptions in the past and we cannot assure you that we will not encounter disruptions in the future. Any such disruption may result in the loss of key information or disruption of our business processes, which could adversely affect our business and results of operations. In addition, our systems are potentially vulnerable to data security breaches, whether by employees or others that may expose sensitive data to unauthorized persons.

19. ***Our Group Entity, Sarvotham Care Limited is involved in certain legal proceedings, which, if determined adversely, may adversely affect our business, results of operations and prospects.***

Our Group Entity, Sarvotham Care Limited is involved in certain tax proceedings at different levels of adjudication before the High Court of Judicature at Andhra Pradesh. A summary of the proceedings involving our Group Entity, Sarvotham Care Limited including the aggregate approximate amount involved to the extent ascertainable, is provided below:

Particulars	Tax cases	Financial implications to the extent quantifiable (₹ in lakhs)
Litigations against our Group Entity	4	85.53

The amounts claimed in these proceedings have been disclosed to the extent ascertainable. We can give no assurance that these legal proceedings will be decided in favour of our Group Entity, Sarvotham Care Limited. Sarvotham Care Limited may incur significant expenses and management time in such legal proceedings. If any adverse developments arise, for example, a change in Indian law or rulings against us by the appellate courts or tribunals, Sarvotham Care Limited may face losses and may have to make provisions in its financial statements, which could increase its expenses and liabilities.

Any adverse ruling in any of the above proceedings or consequent levy of penalties by other statutory authorities may render Sarvotham Care Limited liable to liabilities / penalties and may have a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For further details regarding these legal proceedings, please refer 'Outstanding Litigations and Material Developments' on page 135.

20. ***Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.***

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our services;
- maintaining high levels of customer satisfaction;
- capital expenditure and other costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer “*Management's Discussion and Analysis of Financial Condition and Results of Operations*” on page 128 for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

21. *We face foreign exchange risks that could adversely affect our results of operations.*

We will face foreign exchange rate risk to the extent that certain of our revenues will be denominated in a currency other than the Indian Rupee. Fluctuations in exchange rate between the Indian Rupee and foreign currencies, especially the U.S. dollar, can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and U.S. dollar has been volatile in recent periods and may continue to fluctuate in the future.

Fluctuations in the exchange rates may affect us to the extent of orders being received from the overseas customers. Our Company may enter into certain contracts to hedge exchange rate fluctuations which may or may not adequately cover the potential loss that may arise as a result of such foreign exchange transactions. Moreover, these hedges do not cover all such exposures and are in any event subject to their own risks, including counterparty credit risk. Adverse moves in exchange rates that we have not adequately hedged may adversely impact our profitability and financial condition.

22. *Our Company has availed certain unsecured loans that are callable by the lenders at any time.*

Our Company has availed certain unsecured loans that are callable on demand by the lenders. For further details of these unsecured loans, please refer “*Financial Indebtedness*” on page 132. In case of any demand from lenders for repayment of such unsecured loans, the resultant cash outgo, may adversely affect our business operations and financial position of our Company.

23. *We require substantial financing for our business operations and the failure to obtain additional financing on terms commercially acceptable to us may adversely affect our ability to grow and our future profitability*

We operate in a capital-intensive industry, which requires substantial levels of funding. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our services, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact our Equity Share price.

Our ability to obtain additional financing on favorable terms, if at all, will depend on a number of factors, including our future financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, general market conditions and market conditions for financing activities and the economic, political and other conditions in the markets where we operate.

We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our planned capital expenditure, our business, results of operations and financial condition.

24. *Our Registered and Corporate office is not owned by us.*

Our Company has taken our registered office on leave and license basis from Sujana Sheela Mulakala, one of the members of our Promoter Group, for a period of 3 (three) years commencing from April 1, 2016 until March 31, 2019. There can be no assurance that our Company will be able to successfully renew the said leave and license agreement in a timely manner or at all. Further there can be no assurance that we will not face any disruption of our rights as a licensee and that such leave and license agreement will not be terminated prematurely by the licensor. Any such non-renewal or early termination or any disruption of our rights as licensee may require us to vacate the premises and relocate to a new premises on terms that may not be favourable to us thereby adversely affecting our business, financial conditions and results of operations. For further details on the properties of our Company, please refer to the section titled “*Immovable Properties*” appearing under “*Our Business*” on page 73.

25. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have entered into related party transactions with our Promoters, Promoter Group, Group Entities and Directors. For details of these transactions, please refer “*Related Party Transactions*” on page 115.

We cannot assure you that we will be able to maintain the terms of such transactions or in the event that we enter future transactions with related parties, that the terms of the transactions will be favourable to us. Additionally, while it is our belief that all our related party transactions have been conducted on an arm’s-length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. We may also enter related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

26. *Any variation in the utilisation of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval.*

We propose to utilize the Net Proceeds to meet additional working capital requirements. For further details of the proposed objects of the Issue, please refer “*Objects of the Issue*” on page 60.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business condition, and may adversely affect our business and results of operations.

27. *Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.*

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our board. In addition, schedule of implementation as described herein are based on management’s current expectations and are subject to change due to various factors some of which may not be in our control.

28. ***Our Company's management will have flexibility in utilizing the Net Proceeds. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.***

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2009, as amended, appointment of monitoring agency is required only for Issue size above ₹ 50,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to BSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

29. ***We have experienced negative cash flows in the past. Any such negative cash flows in the future could adversely affect our business, results of operations and prospects.***

The following table sets forth our cash flow for the periods indicated:

Particulars	For the financial year ended March 31, 2017
Net Cash from Operating Activities	6.73
Net Cash from Investing Activities	(1,327.82)
Net Cash from Financing Activities	1,365.54

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Such negative cash flows lead to a net decrease in cash and cash equivalents for financial year ended March 31, 2017. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, please refer “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 117 and 128, respectively.

30. ***We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.***

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, see “Dividend Policy” on page 116.

31. ***We have not registered the trademarks used by us for our business and our inability to obtain or maintain these registrations may adversely affect our competitive business position. Our inability to protect or use our intellectual property rights may adversely affect our business.***

Pursuant to the Asset Transfer Agreement dated February 18, 2016 KISAPL has transferred the trademark ‘Vanta BioScience’ to our Company. Our Company is in the process of making an application to the respective authority for getting the assignment of the said trademark ‘Vanta BioScience’ registered in name of our Company. Further, in terms of the said agreement in case the said trademark is not assigned / transferred the same will be inactivated. Further, our Corporate logo “Vanta Bioscience VBS” is not registered and we do not enjoy the statutory protections accorded to a registered trademark and are subject to the various risks arising out of the same, including but not limited to infringement or passing off our name and logo by a third party.

For further details, please refer “Business – Intellectual Property” on page 80. The registration of any trademark is a time-consuming process, and there can be no assurance that any such registration will be granted as and when applied. In the absence of such registration, competitors or other companies may challenge the validity or scope of our intellectual property. These trademarks are integral to our business, and the loss of any of these intellectual property rights could have a material adverse effect on our business.

There can be no assurance that we will be able to obtain the registration of our trademarks in a timely manner, or at all. If any of our unregistered trademarks are registered in favour of a third party, we may not be able to claim registered ownership of such trademarks and consequently, we may be unable to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities. If our application is objected to, we will not have the right to use this trademark or prevent others from using this trademark or its variations. Our inability to obtain or maintain this trademark in our business thus could adversely affect our reputation, goodwill, business, prospectus and results of operations.

32. *The Promoters and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.*

Upon completion of this Issue, our Promoters and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. Except as disclosed in "Capital Structure" on page 49, we cannot assure you that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

33. *Our insurance coverage may not be sufficient or may not adequately protect us against any or all hazards, which may adversely affect our business, results of operations and financial condition.*

Our principal types of coverage include standard fire and special perils policy, which cover our Gummidipundi Unit, Chennai. While we believe that the insurance coverage which we maintain is in keeping with industry standards and would be reasonably adequate to cover the normal risks associated with the operation of our businesses, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses.

In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. For further details on our insurance arrangements, please refer "Our Business – Insurance" on page 81.

34. *The cost of implementing new technologies for our operations could be significant and could adversely affect our results of operations, cash flows and financial condition.*

Our future success will depend in part on our ability to respond to technological advances and emerging standards and practices on a cost effective and timely basis. We cannot assure you that we will be able to successfully make timely and cost-effective enhancements and additions to the technology underpinning our operational platform, keep up with technological improvements in order to meet our clients' needs or that the technology developed by others will not render our services less competitive or attractive. In addition, rapid and frequent technology and market demand changes can often render existing technologies and equipment obsolete, requiring substantial new capital expenditures or write-down of assets. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs (in comparison to our competitors who are able to successfully implement such technologies) and lead to us being less competitive in terms of our prices or quality of services we provide.

Further, implementation of new or upgraded technology may not be cost effective, which may adversely affect our profitability. In addition, hardware or software failure relating to our IT systems could significantly disrupt customer workflows and cause economic losses for which we could be held liable and which could damage our reputation. Any of the above events may adversely affect our future prospects, business, results of operations and financial condition.

35. *The requirements of being a listed company may strain our resources.*

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI (LODR) Regulations, which require us to file audited / unaudited reports periodically with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, for which significant resources and management overview will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate and relevant experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner or at all.

EXTERNAL RISKS

36. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

Our performance, growth and market price of our Equity Shares are and will be dependent on the health of the Indian economy. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

37. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of corporate and tax laws, may adversely affect our business and financial results.*

Our business and financial performance could be adversely affected by any change in laws or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business including those relating to the industry in which we operate. There can be no assurance that the Government of India or state governments will not introduce new laws, regulations and policies which will require us to obtain additional approvals and licenses or impose onerous requirements on our business.

For example, the new Companies Act, 2013 contains significant changes to Indian company law, including in relation to the issue of capital by companies, disclosures in offer documents, related party transactions, corporate governance, audit matters, internal controls, shareholder class actions, restrictions on the number of layers of subsidiaries, prohibitions on loans to directors, insider trading and restrictions on directors and key management personnel from engaging in forward dealing. Moreover, effective April 1, 2014, companies exceeding certain net worth, revenue or profit thresholds are required to spend at least 2% of average net profits from the immediately preceding three financial years on corporate social responsibility projects, failing which an explanation is required to be provided in such companies' annual reports.

The Government of India has issued the Income Computation and Disclosure Standards (“ICDS”) that will be applied in computing taxable income and payment of income taxes thereon, applicable with effect from the assessment period for Fiscal 2017. ICDS shall apply to all taxpayers following an accrual system of accounting for the purpose of computation of income under the heads of “profits and gains of business or profession” and “income from other sources”. Such specific standards for computation of income taxes in India are relatively new, and the impact of the ICDS on our results of operations and financial condition is uncertain.

The GoI has proposed a comprehensive national goods and services tax (the “GST”) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following the implementation of the GST.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in applicability, interpretation or implementation of any amendment to, or change in, law, regulation or policy, including due to an absence, or a limited body, of administrative or judicial precedent may be time consuming and costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

38. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI’s or central government’s prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

39. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to an investor's assessment of our Company's financial condition.*

As stated in the reports of our Company's independent auditors included in the Draft Prospectus, our Restated Financial Information is prepared and presented in accordance with the Companies Act and restated in accordance with the SEBI (ICDR) Regulations, consistently applied during the periods stated, except as provided in such reports, and no attempt has been made to reconcile any of the information given in the Draft Prospectus to any other principles or to base it on any other standards such as US GAAP or IFRS. Each of US GAAP and IFRS differs in significant respects from Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

40. *Investors may have difficulty enforcing foreign judgments against us or our management.*

We are a limited liability company incorporated under the laws of India. All our directors and executive officers are residents of India and all of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 (“CPC”) on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognise the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of

any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record.

However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the Central Government has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely upon the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

It is unlikely that a court in India would award damages on the same basis as a foreign court if an action was brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian practice. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

Risks Related to the Issue

41. ***The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the SME Platform of BSE may not develop or be sustained after the Issue. Our Company and the Lead Manager have appointed [●] as Designated Market Maker for the Equity Shares of our Company. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the SME Platform of BSE, securities markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

42. ***You will not be able to immediately sell any of the Equity Shares you purchase in this Issue on the SME Platform of BSE.***

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after the Equity Shares in this Issue have been allotted. Approval will require all other relevant documents authorizing the issue of the Equity Shares to be submitted. There could be failure or delays in listing the Equity Shares on the SME Platform of BSE. Further, certain actions must be completed before the Equity Shares can be listed and trading can commence. Investors' "book entry", or "Demat", accounts with Depository Participants are expected to be credited within three Working Days of the date on which the Basis of Allotment is approved by the Designated Stock Exchange. Thereafter, upon receipt of final approval from the Designated Stock Exchange, trading in the Equity Shares is expected to commence within 6 Working Days from Issue Closing Date.

We cannot assure you that the Equity Shares will be credited to the investors' demat account, or that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose of the Equity Shares.

43. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Following the Issue, our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by BSE based on the historical volatility in the price and trading volume of the Equity Shares.

BSE is not required to inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell the Equity Shares or the price at which you may be able to sell the Equity Shares at any particular time.

44. *There is no guarantee that the Equity Shares will be listed on the SME Platform of BSE in a timely manner or at all, and any trading closures at the BSE may adversely affect the trading price of the Equity Shares.*

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after those Equity Shares have been issued and allotted. In addition, we are required to deliver the Prospectus for registration to the Registrar of Companies under the Companies Act, 2013. We cannot assure you that the Registrar of Companies will register such Prospectus in a timely manner or at all. Approval requires all other relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any delay in obtaining the approval would restrict your ability to dispose of the Equity Shares.

The regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in Europe and the U.S. The BSE and the NSE have in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares, in both domestic and international markets. A closure of, or trading stoppage on the BSE could adversely affect the trading price of the Equity Shares.

45. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

46. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an

Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

SECTION III – INTRODUCTION

SUMMARY OF INDUSTRY

Indian Pharmaceutical Industry

Source: <https://www.ibef.org/industry/pharmaceutical-india.aspx>

Introduction

The Indian pharmaceuticals market is the third largest in terms of volume and thirteenth largest in terms of value, as per a report by Equity Master. India is the largest provider of generic drugs globally with the Indian generics accounting for 20 per cent of global exports in terms of volume. Of late, consolidation has become an important characteristic of the Indian pharmaceutical market as the industry is highly fragmented.

India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers who have the potential to steer the industry ahead to an even higher level. Presently over 80 per cent of the antiretroviral drugs used globally to combat AIDS (Acquired Immuno Deficiency Syndrome) are supplied by Indian pharmaceutical firms.

Market Size

The Indian pharma industry, which is expected to grow over 15 per cent per annum between 2015 and 2020, will outperform the global pharma industry, which is set to grow at an annual rate of 5 per cent between the same period!. The market is expected to grow to US\$ 55 billion by 2020, thereby emerging as the sixth largest pharmaceutical market globally by absolute size, as stated by Mr Arun Singh, Indian Ambassador to the US. Branded generics dominate the pharmaceuticals market, constituting nearly 80 per cent of the market share (in terms of revenues).

India has also maintained its lead over China in pharmaceutical exports with a year-on-year growth of 11.44 per cent to US\$ 12.91 billion in FY 2015-16, according to data from the Ministry of Commerce and Industry. In addition, Indian pharmaceutical exports are poised to grow between 8-10 per cent in FY 2016-17. Imports of pharmaceutical products rose marginally by 0.80 per cent year-on-year to US\$ 1,641.15 million.

Overall drug approvals given by the US Food and Drug Administration (USFDA) to Indian companies have nearly doubled to 201 in FY 2015-16 from 109 in FY 2014-15. The country accounts for around 30 per cent (by volume) and about 10 per cent (value) in the US\$ 70-80 billion US generics market.

India's biotechnology industry comprising bio-pharmaceuticals, bio-services, bio-agriculture, bio-industry and bioinformatics is expected grow at an average growth rate of around 30 per cent a year and reach US\$ 100 billion by 2025. Biopharma, comprising vaccines, therapeutics and diagnostics, is the largest sub-sector contributing nearly 62 per cent of the total revenues at Rs 12,600 crore (US\$ 1.89 billion).

Research and Development in India

Source: <https://www.ibef.org/industry/research-development-india.aspx> & IBEF (Innovation & Patents), May 2017

With the government's support, the R&D sector in India is all set to witness some robust growth in the coming years. According to a study by management consulting firm Zinnov, engineering R&D market in India is estimated to grow at a CAGR of 14 per cent to reach US\$ 42 billion by 2020.

India is also expected to witness strong growth in its agriculture and pharmaceutical sectors as the government is investing large sums to set up dedicated research centres for R&D in these sectors.

India's pharmaceutical market is highly fragmented, with 300 large & 18,000 mid-sized & small companies. The country's pharma industry accounts for about 1.4 per cent of the global pharma industry in value terms & 10 per cent in volume terms. Indian healthcare sector, one of the fastest growing industry, is expected to advance at a CAGR of 17 per cent during 2011–20 to reach USD280 billion. This would help drive R&D growth in India; the average R&D expenditure by Indian pharma companies is close to 6 per cent of total revenues. In January 2017, "Innovate in India" a strong intellectual property framework to encourage innovation & to promote development in India for new products & processes to make India a pharmacy hub.

Contract research is one of the fastest growing segment in the Indian healthcare industry. CRAMS industry is estimated to reach USD18 billion in 2018 and expected to witness a strong growth at a CAGR of 18-20 per cent during 2015-18.

Indian pharmaceuticals market is estimated to reach around USD30 billion in 2015. The country's pharmaceutical industry is expected to expand at a CAGR of 12.89 per cent over 2015–20 to reach USD55 billion. The number of ANDA approvals granted by US FDA increased from 109 in FY15 to 201 in FY16 to the Indian companies.

PRECLINICAL STUDIES MARKET SCENARIO

Source: Techno Economic Viability Study dated March 6, 2017

Today all drug companies large or small have realized that they are in a dilemma situation: The drug R&D cost has been climbing up exponentially while the output of their R&D effort measured by the number of new drugs approved each year has remained low. To solve this problem, all major pharma companies have taken radical initiatives, including restructuring their internal R&D systems, changing their R&D strategies and focuses, and meanwhile increasingly searching for available external resources. To realize these goals, R&D work is executed through a networked partnership involving all types of outside resources, including professional outsourcing service providers.

As part of the lengthy process of drug discovery and development, preclinical development, including extensive in vitro pharmacological property profiling and toxicology studies, plays increasingly important roles in reducing the attrition rate for clinical development and overall drug R&D cost. To realize their goals, drug companies have been increasingly searching for new technologies that can probe the toxicity in as early R&D stages as possible so to eliminate undevelopable candidates in early stage and to shorten the time to proof-of-concept test, and seeking collaboration/partnership opportunities with such organizations that possess the desired abilities to fulfill these tasks.

Today drug discovery CROs without in-depth preclinical development service capability gradually fall behind. Although the strong growth of the worldwide demand for preclinical development and toxicology research services just turns back very recently, whether this trend will still continue in the foreseeable future is determined by a number of factors and still remains to see.

To further improve the productivity in their R&D, all drug companies are expected to still make changes in their R&D strategies, including their outsourcing strategies, in the near future in particular in discovery research and preclinical development.

On the positive side, the whole industry is currently focusing on proof-of-concept study, development and incorporation of biomarkers into early stage R&D, and development of biologic drugs including biosimilars. The research in these areas is expected to lead to strong demands for preclinical development service in the foreseeable future.

On the negative side, major pharma companies' current main focus has still been on late stage development. Their R&D budget on preclinical research has not increased as much as for other stages, besides the expected, still-tight overall R&D budget industry-wide in the following years. Moreover, as some institutional knowledge in preclinical study is still needed, drug companies may still want to keep part of their preclinical development work in house.

Overall, although the outsourcing service demand for preclinical development may still experience fluctuations, all above situations combined together determine that this market may still experience positive growth in the near

Drug Development

A variety of approaches are employed to identify chemical compounds that may be developed and marketed. The current state of the chemical and biological sciences required for pharmaceutical development dictates that 5,000–10,000 chemical compounds must undergo laboratory screening for each new drug approved for use in humans. **Of the 5,000–10,000 compounds that are screened, approximately 250 will enter preclinical testing**, and 5 will enter clinical testing. The overall process from discovery to marketing of a drug can take 10 to 15 years.

To deal with increasing costs of drug development and high failure rates, many large pharmaceutical companies are slashing R&D departments and turning to outsourcing. According to Kalorama information, outsourcing from pharmaceutical industries is expected to increase by 20% in 2016, enlarging the contract research organisation market to a value of \$21 billion.

Over the last several years some widely discernible trends of the pharmaceutical industry's drug development process have emerged. Much of this is driven by three factors. The first is that a declining percentage of the drugs produced by research constitute genuine breakthroughs capable of substantially advancing the respective standards of care. At the

same time, both public and private players have grown increasingly reluctant to pay constantly higher prices for the marginal, incremental improvements that characterize most of the new drugs coming to market. Given the ceaseless demands of finance-driven pharma companies to maintain the profitability levels they enjoyed during the 1980s and '90s glory days, these factors have combined to shape the R&D pattern.

In view of the low success rate, the R&D departments of research pharmaceutical companies will not just be investigating one drug but, at any one time, will be looking at many different substances at varying points in the development cycle. A large company may have 100–200 substances going through its development pipeline at any one time.

Conclusion

Overall, although the outsourcing service demand for preclinical development may still experience fluctuations, all above situations combined together determine that this market may still experience positive growth in the near future.

Based on analysis by “Research and Markets” as given in their article “New Trends in the 2015 Global Preclinical Development Outsourcing Market”, the global preclinical development and toxicology research outsourcing market will likely experience a CAGR of 7% between 2015 and 2020 and will reach around \$6.8 B by 2020. By then the outsourcing penetration in preclinical development is expected to reach about 45%.

Within the global preclinical development outsourcing market, China and India are expected to play more important roles. Possessing a number of advantages, China is considered one of the ideal places for conducting large animal-based and India for small animal based toxicology research and preclinical development. Driven by the growing demands by the local drug companies, including both domestics and multinationals, the Indian and Chinese preclinical development outsourcing markets are expected to still experience strong growth in the foreseeable future.

One of the major services of VBS is conducting variety of *in vitro* (cell, tissue and organisms) and *in vivo* (animal) toxicology studies for its diverse clients as per various regulatory requirements from across the world. Toxicology is a branch of biology, chemistry, and pharmacology concerned with the study of the adverse effects of chemicals on living organisms. It also studies the harmful effects of chemical, biological and physical agents in biological systems that establish the extent of damage in living organisms. The relationship between dose and its effects on the exposed organism is of high significance in toxicology. Toxicology and safety assessment are sometimes used interchangeably and considered as synonymous.

VBS has state of the art facilities and infrastructure necessary for conduct of all kind of toxicology studies for Chemicals, Pharmaceuticals, Cosmetics, Agrochemicals like Pesticides, Insecticides, Excipients, Novel Feed Additives The data generated from these studies are submitted to regulatory agencies worldwide before they are put in use for the consumption of domestic animals and human being. In addition, VBS also conducts preclinical proof-of-concept (PoC) studies for novel pharmaceuticals and products intended for new indications in variety of animal models of human diseases through a robust process of validation.

Pharmaceutical drug development is an expensive and lengthy process with high risk of failures in the late state of clinical development. Toxicity is the most cited reason after efficacy for late stage failure of drugs. Therefore, there has been a shift in the approach of pharmaceutical industry from traditional drug development process. This has led to a more focused approach to identify and eliminate the drug candidates having potential to cause unacceptable toxicities and safety issues at the early phase of drug discovery and development phase. This strategic shift in the drug development process created tremendous opportunities for preclinical contract research organization for collaboration with pharmaceutical industry for conduct of early discovery toxicology and pharmacology studies for identification of better candidate molecules for further development. VBS equipped with state of the art infrastructure, qualified and highly experienced scientists with thorough knowledge and understanding of pharmaceutical drug development process is well positioned for any future collaboration and partnership with pharmaceutical industry from India and abroad. This integrated drug discovery and development model is emerging as symbiotic relationship for both the partners. VBS plans to leverage this opportunity on priority and integrate itself with global pharmaceutical industry for any future collaboration in this area as part of its strategic business plan.

Indian Pharmaceutical Industry

Source: <https://www.ibef.org/industry/pharmaceutical-india.aspx>

Introduction

The Indian pharmaceuticals market is the third largest in terms of volume and thirteenth largest in terms of value, as per a report by Equity Master. India is the largest provider of generic drugs globally with the Indian generics accounting for 20 per cent of global exports in terms of volume. Of late, consolidation has become an important characteristic of the Indian pharmaceutical market as the industry is highly fragmented.

India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers who have the potential to steer the industry ahead to an even higher level. Presently over 80 per cent of the antiretroviral drugs used globally to combat AIDS (Acquired Immuno Deficiency Syndrome) are supplied by Indian pharmaceutical firms.

The UN-backed Medicines Patent Pool has signed six sub-licences with Aurobindo, Cipla, Desano, Emcure, Hetero Labs and Laurus Labs, allowing them to make generic anti-AIDS medicine TenofovirAlafenamide (TAF) for 112 developing countries.

Market Size

The Indian pharma industry, which is expected to grow over 15 per cent per annum between 2015 and 2020, will outperform the global pharma industry, which is set to grow at an annual rate of 5 per cent between the same period!. The market is expected to grow to US\$ 55 billion by 2020, thereby emerging as the sixth largest pharmaceutical market globally by absolute size, as stated by Mr Arun Singh, Indian Ambassador to the US. Branded generics dominate the pharmaceuticals market, constituting nearly 80 per cent of the market share (in terms of revenues).

India has also maintained its lead over China in pharmaceutical exports with a year-on-year growth of 11.44 per cent to US\$ 12.91 billion in FY 2015-16, according to data from the Ministry of Commerce and Industry. In addition, Indian pharmaceutical exports are poised to grow between 8-10 per cent in FY 2016-17. Imports of pharmaceutical products rose marginally by 0.80 per cent year-on-year to US\$ 1,641.15 million.

Overall drug approvals given by the US Food and Drug Administration (USFDA) to Indian companies have nearly doubled to 201 in FY 2015-16 from 109 in FY 2014-15. The country accounts for around 30 per cent (by volume) and about 10 per cent (value) in the US\$ 70-80 billion US generics market.

India's biotechnology industry comprising bio-pharmaceuticals, bio-services, bio-agriculture, bio-industry and bioinformatics is expected grow at an average growth rate of around 30 per cent a year and reach US\$ 100 billion by 2025. Biopharma, comprising vaccines, therapeutics and diagnostics, is the largest sub-sector contributing nearly 62 per cent of the total revenues at Rs 12,600 crore (US\$ 1.89 billion).

Road Ahead

The Indian pharmaceutical market size is expected to grow to US\$ 100 billion by 2025, driven by increasing consumer spending, rapid urbanisation, and raising healthcare insurance among others.

Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers that are on the rise.

The Indian government has taken many steps to reduce costs and bring down healthcare expenses. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programmes, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

PRECLINICAL STUDIES MARKET SCENARIO

Source: **Techno Economic Viability Study dated March 6, 2017**

Today all drug companies large or small have realized that they are in a dilemma situation: The drug R&D cost has been climbing up exponentially while the output of their R&D effort measured by the number of new drugs approved each year has remained low. To solve this problem, all major pharma companies have taken radical initiatives, including restructuring their internal R&D systems, changing their R&D strategies and focuses, and meanwhile increasingly searching for available external resources. To realize these goals, R&D work is executed through a networked partnership involving all types of outside resources, including professional outsourcing service providers.

As part of the lengthy process of drug discovery and development, preclinical development, including extensive in vitro pharmacological property profiling and toxicology studies, plays increasingly important roles in reducing the attrition rate for clinical development and overall drug R&D cost. To realize their goals, drug companies have been increasingly searching for new technologies that can probe the toxicity in as early R&D stages as possible so to eliminate undevelopable candidates in early stage and to shorten the time to proof-of-concept test, and seeking collaboration/partnership opportunities with such organizations that possess the desired abilities to fulfill these tasks.

Today drug discovery CROs without in-depth preclinical development service capability gradually fall behind. Although the strong growth of the worldwide demand for preclinical development and toxicology research services just turns back very recently, whether this trend will still continue in the foreseeable future is determined by a number of factors and still remains to see.

To further improve the productivity in their R&D, all drug companies are expected to still make changes in their R&D strategies, including their outsourcing strategies, in the near future in particular in discovery research and preclinical development.

On the positive side, the whole industry is currently focusing on proof-of-concept study, development and incorporation of biomarkers into early stage R&D, and development of biologic drugs including biosimilars. The research in these areas is expected to lead to strong demands for preclinical development service in the foreseeable future.

On the negative side, major pharma companies' current main focus has still been on late stage development. Their R&D budget on preclinical research has not increased as much as for other stages, besides the expected, still-tight overall R&D budget industry-wide in the following years. Moreover, as some institutional knowledge in preclinical study is still needed, drug companies may still want to keep part of their preclinical development work in house.

Overall, although the outsourcing service demand for preclinical development may still experience fluctuations, all above situations combined together determine that this market may still experience positive growth in the near future.

The Pharmaceutical R & D Industry

The research ecosystem in India presents a significant opportunity for multinational corporations across the world due to its intellectual capital available in the country. Legions of Indian engineers working across the globe highlight the highly trained manpower available at competitive costs. Consequently, several MNCs have shifted or are shifting their research and development (R&D) base to India. These R&D bases either develop products to serve the local market or help the parent company overseas deliver new innovative generation of products faster to the markets across the world.

Market Size

India's pharmaceutical industry, which accounts for about 1.4 per cent of the global pharmaceutical industry in value terms and 10 per cent in volume terms, is expected to remain a major R&D growth driver

Indian Pharma companies spend 8-11 percent of their total turnover on R &D. Expenditure on R & D is likely to increase due to the introduction of product patents. Companies need to develop new drugs to boost sales.

Drug Development

A variety of approaches are employed to identify chemical compounds that may be developed and marketed. The current state of the chemical and biological sciences required for pharmaceutical development dictates that 5,000–10,000 chemical compounds must undergo laboratory screening for each new drug approved for use in humans. **Of the 5,000–10,000 compounds that are screened, approximately 250 will enter preclinical testing**, and 5 will enter clinical testing. The overall process from discovery to marketing of a drug can take 10 to 15 years.

To deal with increasing costs of drug development and high failure rates, many large pharmaceutical companies are slashing R&D departments and turning to outsourcing. According to Kalorama information, outsourcing from pharmaceutical industries is expected to increase by 20% in 2016, enlarging the contract research organisation market to a value of \$21 billion.

Over the last several years some widely discernible trends of the pharmaceutical industry's drug development process have emerged. Much of this is driven by three factors. The first is that a declining percentage of the drugs produced by research constitute genuine breakthroughs capable of substantially advancing the respective standards of care. At the same time, both public and private players have grown increasingly reluctant to pay constantly higher prices for the marginal, incremental improvements that characterize most of the new drugs coming to market. Given the ceaseless demands of finance-driven pharma companies to maintain the profitability levels they enjoyed during the 1980s and '90s glory days, these factors have combined to shape the R&D pattern.

In view of the low success rate, the R&D departments of research pharmaceutical companies will not just be investigating one drug but, at any one time, will be looking at many different substances at varying points in the development cycle. A large company may have 100–200 substances going through its development pipeline at any one time.

Conclusion

Overall, although the outsourcing service demand for preclinical development may still experience fluctuations, all above situations combined together determine that this market may still experience positive growth in the near future.

Based on analysis by “Research and Markets” as given in their article “New Trends in the 2015 Global Preclinical Development Outsourcing Market”, the global preclinical development and toxicology research outsourcing market will likely experience a CAGR of 7% between 2015 and 2020 and will reach around \$6.8 B by 2020. By then the outsourcing penetration in preclinical development is expected to reach about 45%.

Within the global preclinical development outsourcing market, China and India are expected to play more important roles. Possessing a number of advantages, China is considered one of the ideal places for conducting large animal-based and India for small animal based toxicology research and preclinical development. Driven by the growing demands by

the local drug companies, including both domestics and multinationals, the Indian and Chinese preclinical development outsourcing markets are expected to still experience strong growth in the foreseeable future.

Overview

Vanta Bioscience Limited (VBS) is a preclinical contract research organization, offering a host of preclinical safety assessment services for clientele from Pharmaceutical, Medical Devices, Nutraceuticals, Feed Additive, Biotech, Agrochemicals, Cosmetics, and Chemical industries. In addition we also provide risk assessment services for evaluating the safety of the Active Pharmaceutical Ingredients (API), excipients, extractable and leachables including pharmaceutical impurities resulting due to manufacturing process or due to degradation of the product. VBS also provides expert services for determination of health based exposure limits (e.g. permitted daily exposure (PDE) or allowable daily exposure (ADE) including occupational exposure limits (OEL) for pharmaceutical manufacturers.

We entered into an asset transfer agreement dated February 18, 2016 with Kemin Industries South Asia Private Limited, Chennai for the purchase of fully operational toxicology facility 'Vanta Bioscience' situated at Plot K2B, SIPCOT Industrial Estate, Gummidipundi, Chennai 601 201. The purchase include the entire facility including the land & buildings, equipments, materials, spares, laboratory animals to be used in preclinical research and other inventories including all licenses, permits, approvals, registrations, accreditations, IPRs, SOPs and existing manpower. The consideration for the aforementioned purchase is Rs. 1,200 lakhs. Our Company has taken possession of the said preclinical CRO facility at Gummidipundi, Chennai and has commenced commercial operations thereat from April 1, 2017. Currently we are mainly doing previous pending research work and are also getting new work from existing clients of "Vanta Bioscience" erstwhile division of Kemin Industries South Asia Private Limited. In addition to this we are in negotiation with few clients in Agro Chemical, Pharmaceutical and Food Industry.

One of the major services of VBS is conducting variety of *in vitro* (cell, tissue and organisms) and *in vivo* (animal) toxicology studies for its diverse clients as per various regulatory requirements from across the world. Toxicology is a branch of biology, chemistry, and pharmacology concerned with the study of the adverse effects of chemicals on living organisms. It also studies the harmful effects of chemical, biological and physical agents in biological systems that establish the extent of damage in living organisms. The relationship between dose and its effects on the exposed organism is of high significance in toxicology. Toxicology and safety assessment are sometimes used interchangeably and considered as synonymous.

VBS has state of the art facilities and infrastructure necessary for conduct of all kind of toxicology studies for Chemicals, Pharmaceuticals, Cosmetics, Agrochemicals like Pesticides, Insecticides, Excipients, Novel Feed Additives. The data generated from these studies are submitted to regulatory agencies worldwide before they are put in use for the consumption of domestic animals and human being. In addition, VBS also conducts preclinical proof-of-concept (PoC) studies for novel pharmaceuticals and products intended for new indications in variety of animal models of human diseases through a robust process of validation.

Pharmaceutical drug development is an expensive and lengthy process with high risk of failures in the late state of clinical development. Toxicity is the most cited reason after efficacy for late stage failure of drugs. Therefore, there has been a shift in the approach of pharmaceutical industry from traditional drug development process. This has led to a more focused approach to identify and eliminate the drug candidates having potential to cause unacceptable toxicities and safety issues at the early phase of drug discovery and development phase. This strategic shift in the drug development process created tremendous opportunities for preclinical contract research organization for collaboration with pharmaceutical industry for conduct of early discovery toxicology and pharmacology studies for identification of better candidate molecules for further development. VBS equipped with state of the art infrastructure, qualified and highly

experienced scientists with thorough knowledge and understanding of pharmaceutical drug development process is well positioned for any future collaboration and partnership with pharmaceutical industry from India and abroad. This integrated drug discovery and development model is emerging as symbiotic relationship for both the partners. VBS plans to leverage this opportunity on priority and integrate itself with global pharmaceutical industry for any future collaboration in this area as part of its strategic business plan.

As per the agreement, Kemin Industries South Asia Private Limited has transferred all the rights and licences to use the company name “Vanta Bioscience” as part of the name of new company.

Our Products & Services:

Preclinical Studies

Before testing a drug in volunteers and/or patient's, researchers must find out whether it is effective in treating the intended disease and safe enough to be administered without any potential serious harm (also called toxicity). Therefore, preclinical studies are required to establish the safety and effectiveness of a drug product before it is tested in human being. Similarly, preclinical studies are also required for demonstration of safety/toxicity of chemicals, agrochemicals, cosmetics, food/feed additives and medical devices before their registration and approval. Broadly, for better understanding preclinical studies could be categorized as follows:

- *In Vitro*
- *In Vivo*

A variety of *in vitro* and *in vivo* studies in different test systems (laboratory animals, cells/tissues, organisms etc.) are conducted to establish the safety and effectiveness of the product. Therefore, all these studies are vital in the successful development of a drug product and registration and/or approval of chemicals, agrochemicals, cosmetics etc., across various countries following the global regulatory guidance documents that include OECD, ICH, MHRA, EMEA, FDA, EPA, FIFRA etc.

VBS has full capability to conduct all kind of preclinical studies in strict compliance to highest quality standards (Good Laboratory Practice) and in accordance to various regulatory requirements from across the world. Based on the findings in these preclinical and non-clinical studies, regulatory agencies review the data and grant an approval for further testing in human population and/or marketing (in case of chemicals and agrochemicals).

as business strategy we plan to set up an animal breeding unit to use these for in-house and also to sell animals to other research organizations in India and South East Asia.

TECHNOLOGY & PROCESSES

Preclinical Research and Toxicology Process

Pre-Observation

The entire observation premises are clean room facility with ISO Class condition. Any staff entering into the animal house and experimental rooms/areas has to undergo thorough bio-security check and follow strict aseptic precautions, including sterile coverall suits.

The food material procured for the animals is Gamma radiated and treated with UV. The food material along with cages are sent through autoclave for clean supply to animals. The water supplied to animals is RO treated and UV treated.

The formulation to be used on the animals is weighed as per the dosage (low, medium & high) in the clean and sterile formulation room.

In the procedure room, the formulation is administered into the animals as per objective of the research and variety of observations including clinical signs and body weights are recorded.

Observation

Depending upon the type of study, observations vary from 14 days to 24 months. During these days, the animals are put in “Individually Ventilated Cage” (IVC).

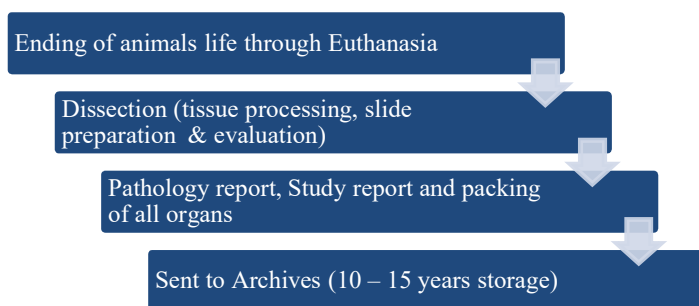

During observation, based on the requirement, the animals are kept in Functional operational Battery (FOB) for Neuro behavioural analysis.

Raw data of the animal is collected during observations in compliance to GLP and analysed suitable, based on the requirement, blood samples are also collected for analysis purpose.

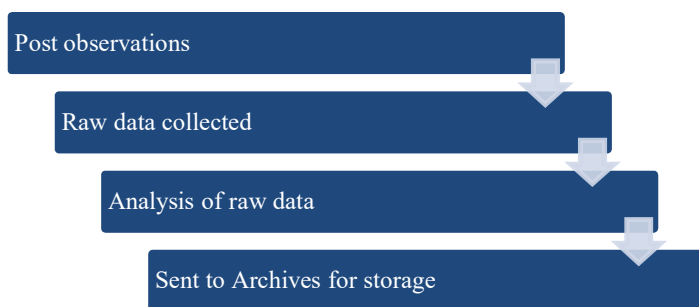

Tests are conducted on animals only during day light hours. Hence the testing on animals is done only in 1 shift of 10 hours a day.

Post Observation

Animals

- Post observation, the animals will be given Euthanasia which leads to painless killing of animals.
- Later these animals will undergo necropsy dissection in which various tissues of the animal are collected processed and histopathology slides are prepared. Histopathology slides are evaluated by a qualified and board certified pathologist.
- These tissues are then packed. Each animal tissues are packed separately.
- The packages are then sent to Archives and maintained for at least 9 years.

Analysis

- During observation, raw data (feed consumption, body weights etc) is collected for each animal.
- The data is subjected to statistical analysis.
- Post analysis, the information is documented accordingly
- One copy of the document is sent to the client and other is preserved in Archives.

Material

- After observation, the cages are washed and then sent through Autoclave for reuse.
- The waste collected during dissection is sent to Bio-Medical waste disposal store. The waste is cleared once in fortnight by a third party for incineration purpose.
- Bedding material once used cannot be reused and therefore sent to waste management team. The material is taken away by a third party for incineration.

Competition

Contract research organisations (CROs) have become essential to the pharma, biotech, and medtech industries by supporting clients' efforts to test, refine, and market the latest pharmaceuticals and medical devices. The CRO marketplace is becoming increasingly competitive: mergers and partnerships enhance larger companies' full-service capabilities and international reach, while others are focusing on niche sectors or functional service provider (FSP) contracts that allow clients to outsource individual services instead of entire studies or projects. There are certain key players in the preclinical market in India. These big players offer a stiff competition to western CROs both in terms of quality of work and price. Small to mid sized preclinical CROs in India also run their laboratories to near full capacity, suggesting the demand for preclinical testing is not fulfilled. We believe there will be a potential growth of preclinical toxicology outsourcing and CROs in Asia that can provide quality work at a lower cost will have an advantage.

We face the competition in our business from other existing research and development companies. Many of our competitors have substantially large capital base and resources than we do. We believe that the principal factors affecting competition in our business include client relationships, reputation, the abilities of employees, market focus and the relative quality and price of the services.

For further details please refer to section “*Industry Overview*” beginning on page 68.

Approach to Marketing and Marketing Set-up

As part of business development, VBS plans to start a Business Development function and Project Management Office (PMO) for preclinical and animal breeding services. The primary objectives of these functions would be as follows:

- Differentiate from competitors through identification of unique and customized services for each client.
- Strategy to introduce more than one product/services or VBS must be first to meet any of the special needs of the customers/market.
- Client engagement

These two strategies hinge on VBS understanding of their client's need. VBS is working a mix up of few of the market strategies like “Blue ocean strategy” (Stand out of the crowd, make yourself unique in some aspect) and a “4 Action framework” (i.e. work on increasing an already existing attribute or introduce if it is not available) in the list of product.

Introduction of VBS in the market will include

- Advertisements,
- Road shows,
- Seminars on technical aspects & showcasing the capabilities,
- Lectures on specialized topics from international speakers

The frequency of these activities will be defined for all the four zones of India with major emphasis at Mumbai, Hyderabad, and Bangalore. The market in north India needs to be tapped and this will require one-on-one interaction at initial stage and then introducing seminars and sponsorships in those area.

Parallel to introduction data on the specific need of the clients i.e. strains required in term of volume and complexity, services expected from preclinical studies will be assimilated and evaluated. The strategy will be developed on above lines for introducing or modifying the attributes wherever required.

The PCA Act envisages preventing infliction of unnecessary pain or suffering on animals and amending the laws relating to the prevention of cruelty to animals. The Act also provides for the constitution of an Animal Welfare Board to take care of the welfare of the animals in general, and also provides that the Animal Welfare Board constitute a Committee for the Purpose of Control and Supervision on Experimentation with Animals (“CPCSEA”). This committee is empowered to regulate the legal and ethical aspects of experimental animals being used in research and enact preventive measures wherever there is violation of the law.

The PCA Act renders legality to the performance of experiments (including experiments involving operations) on animals for the purpose of advancement by new discovery of physiological knowledge or of knowledge which shall be useful for saving or for prolonging life or alleviating suffering or for combating any disease, whether of human beings, animals or plants. However, the CPCSEA is entrusted with the duty to monitor the experiments on animals through an Institutional Animals Ethics Committee and ensure taking all such measures as may be required so that unnecessary pain or suffering is not meted out to animals being subjected to the experiments.

The PCA Act also provides that that in cases where experiments are performed in any institution, the responsibility for performing the experiments with due care and humanity and under the influence of some anaesthetic of sufficient power to prevent the animals feeling pain, is placed on the person in charge of the institution and that, in cases where experiments are performed outside an institution by individuals, such individuals are qualified in that behalf and the experiments are performed on their full responsibility. The Breeding of and Experiments on Animals (Control and Supervision) Rules, 1998 (the “Breeding Rules”), issued under the PCA Act, provides the no establishment shall carry on the business of breeding of animals or trade of animals for the purpose of experiments unless it is registered under the PCA Act. Every such registered establishment has to maintain a register as per the specified format and record complete particulars about the kind of animal to be used for conducting any experiment, the health of the animal, the nature of experiment to be performed, and the reasons necessitating the performance of such an experiment on particular species.

The Institutional Animals Ethics Committee, established under PCA Act is entrusted with the control and supervision of experiments on animal performed in an establishment which is constituted and operated in accordance with procedures specified for the purpose by the CPCSEA. Any registered establishment, before acquiring an animal or conducting any experiment on such animal, has to apply for permission of the CPCSEA or the Institutional Animals Ethics Committee.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

Vanta Bioscience Limited (VBS) is a preclinical contract research organization, offering a host of preclinical safety assessment services for clientele from Pharmaceutical, Medical Devices, Nutraceuticals, Feed Additive, Biotech, Agrochemicals, Cosmetics, and Chemical industries. In addition we also provide risk assessment services for evaluating the safety of the Active Pharmaceutical Ingredients (API), excipients, extractable and leachables including pharmaceutical impurities resulting due to manufacturing process or due to degradation of the product. VBS also provides expert services for determination of health based exposure limits (e.g. permitted daily exposure (PDE) or allowable daily exposure (ADE) including occupational exposure limits (OEL) for pharmaceutical manufacturers.

We entered into an asset transfer agreement dated February 18, 2016 with Kemin Industries South Asia Private Limited, Chennai for the purchase of fully operational toxicology facility ‘Vanta Bioscience’ situated at Plot K2B, SIPCOT Industrial Estate, Gummidipundi, Chennai 601 201. The purchase include the entire facility including the land & buildings, equipments, materials, spares, laboratory animals to be used in preclinical research and other inventories including all licenses, permits, approvals, registrations, accreditations, IPRs, SOPs and existing manpower. The consideration for the aforementioned purchase is Rs. 1,200 lakhs. Our Company has taken possession of the said preclinical CRO facility at Gummidipundi, Chennai and has commenced commercial operations thereat from April 1, 2017. Currently we are mainly doing previous pending research work and are also getting new work from existing clients of “Vanta Bioscience” erstwhile division of Kemin Industries South Asia Private Limited. In addition to this we are in negotiation with few clients in Agro Chemical, Phamaceutical and Food Industry.

One of the major services of VBS is conducting variety of *in vitro* (cell, tissue and organisms) and *in vivo* (animal) toxicology studies for its diverse clients as per various regulatory requirements from across the world. Toxicology is a branch of biology, chemistry, and pharmacology concerned with the study of the adverse effects of chemicals on living organisms. It also studies the harmful effects of chemical, biological and physical agents in biological systems that establish the extent of damage in living organisms. The relationship between dose and its effects on the exposed organism is of high significance in toxicology. Toxicology and safety assessment are sometimes used interchangeably and considered as synonymous.

VBS has state of the art facilities and infrastructure necessary for conduct of all kind of toxicology studies for Chemicals, Pharmaceuticals, Cosmetics, Agrochemicals like Pesticides, Insecticides, Excipients, Novel Feed Additives The data generated from these studies are submitted to regulatory agencies worldwide before they are put in use for the consumption of domestic animals and human being. In addition, VBS also conducts preclinical proof-of-concept (PoC) studies for novel pharmaceuticals and products intended for new indications in variety of animal models of human diseases through a robust process of validation.

Pharmaceutical drug development is an expensive and lengthy process with high risk of failures in the late state of clinical development. Toxicity is the most cited reason after efficacy for late stage failure of drugs. Therefore, there has been a shift in the approach of pharmaceutical industry from traditional drug development process. This has led to a more focused approach to identify and eliminate the drug candidates having potential to cause unacceptable toxicities and safety issues at the early phase of drug discovery and development phase. This strategic shift in the drug development process created tremendous opportunities for preclinical contract research organization for collaboration with pharmaceutical industry for conduct of early discovery toxicology and pharmacology studies for identification of better candidate molecules for further development. VBS equipped with state of the art infrastructure, qualified and highly experienced scientists with thorough knowledge and understanding of pharmaceutical drug development process is well positioned for any future collaboration and partnership with pharmaceutical industry from India and abroad. This integrated drug discovery and development model is emerging as symbiotic relationship for both the partners. VBS plans to leverage this opportunity on priority and integrate itself with global pharmaceutical industry for any future collaboration in this area as part of its strategic business plan.

As per the agreement, Kemin Industries South Asia Private Limited has transferred all the rights and licences to use the company name “Vanta Bioscience” as part of the name of new company.

For further details please refer to the section titled ‘Our Business’ on page 73.

Significant developments subsequent to the last financial year:

After the date of last balance sheet i.e. March 31, 2017, the Directors of our Company confirm that, our Company has commenced commercial activities at its recently acquired preclinical CRO facility at Gummidipundi, Chennai only since April 1, 2017.

Key factors affecting the results of operation:

Our Company's future results of operations could be affected potentially by the following factors:

Government Approvals:

As per the agreement with Kemin Industries South Asia Private Limited, all licenses, permits, approvals, registration, accreditation and Standard operating procedures will be transferred to the company after closing of agreement. Since the unit has been taken over as an operating unit, all licenses, permits, approvals, registration, accreditation and Standard operating procedures are in place. However, the company has to apply for name change for all Licenses, permits, approvals and registration. In addition, regulatory agencies may introduce newer stricter regulations that prevent or restrict preclinical studies and trials. Our preclinical studies and trials may also be the focus of negative attention from special interest groups that oppose preclinical trials on animals on ethical grounds. Any inability to conduct preclinical trials would have a material adverse effect on our business and results of operations.

Our preclinical trials create a risk of liability and increased regulations, which may have an adverse impact on our business and results of operations.

Preclinical trial contract research services involve the testing of new drugs, chemicals, feed ingredients, agrochemicals, biologics and medical devices on cells, tissues and animals. This testing creates risks of liability for personal injury, sickness or death of animals resulting from their participation in the studies. These risks include, unforeseen adverse side effects, improper application or administration of a new drug, biologic, or device, and the professional malpractice of animal care providers.

Our ability to attract retain Skilled and technical staff:

Our activities in preclinical research and development require our Company to engage highly qualified & skilled employees, like scientists, with specialised training. Our performance depends largely on the efforts and abilities of our senior management and other key personnel, including our present officers who have specialized technical know-how. Thus our growth is likely to be affected by our ability to attract and retain skill and technical manpower.

Regulatory developments:

Our Company is regulated by the Companies Act and some of its activities are subject to supervision and regulation by statutory and regulatory authorities. It is therefore subject to changes in Indian law, as well as to changes in regulation and government policies and accounting principles.

Discussion on Results of Operation:

FY 2017 is the first financial year of our Company and we have not carried any operations during the period ended March 31, 2017. Hence no profit and loss statement has been prepared.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated primarily through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP, issued the consolidated FDI Policy by way of circular no. D/o IPP F. No. 5(1)/2016-FC-1 dated June 7, 2016 (“**FDI Policy**”), which with effect from June 7, 2016, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 6, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (“**FDI**”) Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, OCBs cannot participate in the Issue.

Accordingly, the Equity Shares are being offered and sold outside the United States in offshore transactions in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.
