

To whom it may concern

Subject: Declaration

I am pleased to declare on behalf of Silvateam that the following Non-Clinical Toxicity studies on Silvafeed ByProQ were conducted at Vanta Bioscience Limited, Chennai for submission to EFSA/EU Commission, for the renewal of the authorization as a feed additive in Europe.

To the best of our knowledge, the studies were conducted fulfilling high quality standards within the agreed timelines and meeting the compliance requirements to OECD principles of GLP. The study data was accepted by EFSA and no further information were required with this respect. However, the whole assessment by EFSA of the substance is not finished and their opinion has not been issued yet.

These studies will facilitate M/s Silvateam in securing approval to Marketing of Silvafeed ByProQ as a feed additive in Europe and, possibly, worldwide.

The study (ies) conducted at VBS are:

1. 90 Days Oral (Dietary) Toxicity Study of Silvafeed ByProQ in Sprague Dawley Rats - Guidelines OECD 408

With best regards,

San Michele Mondovì, 2022-06-30
